

Helping you

Keep young people safe and information secure

See it.

Notice a safeguarding or data protection concern.
A worry. A risk. A potential breach.

Hear it.

Listen carefully when someone raises a concern.
Take it seriously, without judgement or delay.

Act on it.

Respond quickly and follow the procedures.
Report factually, accurately and promptly.

If in doubt, report it!

We help you see it through clear guidance. We make sure you hear it through manager briefings and everyday conversations. We support you to act on it, so you feel confident stepping in when it matters.
